Open Source: Today and Tomorrow

written by Manoj Khanna | June 29, 2004

It all started from developer to developer, and now its going from corporate to corporate and now even from government to their other government departments. There is a growing love for Open Source and its wide and clear. To understand things more clearly in a detailed perspective [John Carroll](#) recently wrote a series of articles on Open Source, which is interesting and at the same time informative:

[Why choose open source?](#)

[Open source vs. proprietary: Both have advantages](#)

[How the software economy is driven by proprietary work](#)

[Open Source: Supply and demand](#)
